TOP PRIORITY: STARLINER DOCKING SUCCESS

STARLINER "CALYPSO"

Boeing Starliner successfully docked with ISS Harmony module. Redundant US crew access secured.

PRECISION

99.9%

AUTONOMOUS

STATUS

NOMINAL

STRATEGIC INSIGHT

Ends US reliance on SpaceX for crew transport. Critical for station maintenance.

INDIA RADAR

High domestic interest due to Suni Williams heritage.

MISSION CONCEPT VISUALIZATION

THE ORBITAL HANDSHAKE: High-detail render of Starliner docking with the ISS International Docking Adapter (IDA-2).

MISSION #1: STARLINER ISS INTEGRATION

SUCCESS

UPDATE:

Docked at 17:34 UTC. Hatch opening ceremony completed. All systems nominal.

MISSION #4: STARSHIP FLIGHT 4 ANALYSIS

ANALYSIS

UPDATE:

Booster splashdown precision confirmed within 5 meters. Clears path for tower catch attempt.

[SOURCE: SpaceX.com](#)

MISSION #5: ESA EARTHCARE MILESTONE

ACTIVE

UPDATE:

Cloud Profiling Radar transmitted first high-res vertical maps of atmosphere.
